

Brno University of Technology (BUT) ranks among the top universities in the Czech Republic and aspires to reach excellence not only in the sphere of education, but also in science, research and cooperation with the application sphere. BUT also aspires to fulfil its third role, that is, in the social sphere. In the field of science, research and innovation, BUT strives to intensify its cooperation with industry, including the public sphere, where it remains committed to creating the best possible conditions for creative work, technology transfer and growth of innovation potential.
